EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kenneth Baker, Reg. No. 52,584 on April 28, 2006.

The application has been amended as follows:

In claim 1 in line 4 after " MRI " has been added -- while maintaining at least some power to said at least one gradient coil --.

The following is an examiner's statement of reasons for allowance:

In Ishihara et al (US5916161) power to the entire apparatus is shut off upon exceeding of a temperature threshold, including the power to the gradient coils thereby suffering the avowed shortcoming of interruption and delay of the scan protocol..

Hedlund et al (US6516282) and Emeric et al (US6992483) are directed to control of gradient coil cooling in accordance with a temperature regulatory algorithm, see col. 8 lines 19 – 41 of the former as exemplary.

Art Unit: 3768

Accordingly the relevant prior art does not teach or suggest control of power applied to a gradient coil or coils based upon bore and thermal boundary conditions while continuing application of at least some power to the at least one coil.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
